
SPANISH FORK NORTH EAST IRRIGATION COMPANY

August 10, 1965

Richard K. Griffin
Resident-Engineer
State Road Commission
P. O. Box 357
American Fork, Utah

Dear Sir:

The water users of the North East Irrigation Company in Spanish Fork, Utah wish to protest to you the opening up of certain drains by W. W. Clyde and Co. in their excavation work on the East bench hillside immediately East of Spanish Fork.

The stockholders of said company own and distribute what is commonly known as the hillstream water which is used for irrigation purposes on pasture lands and farming ground in an area Northeast of Spanish Fork.

It has been noted since the excavation work commenced that there has been diverted a sizeable amount of water from underground springs which it is felt has reduced the flow of hillstream water. It is felt that this loss of water will prove to be detrimental to the stockholders of this company, and it is requested that action be taken to correct this situation and to protect and restore to our water-users their full water benefits.

Very truly yours,

Harold H. Hanson
Secretary

Harold H. Hanson
